SUMMARY

Self taught programmer with ambition to gain expertise knowledge in software engineering by following the best industry practices, Also learning to choose the right tools for the right task to deliver high quality software well tested and clean coded.

TECHNICAL SKILLS

<ul style="list-style-type: none">• <u>React</u>• <u>Javascript</u>• <u>Bootstrap</u>• <u>ES6</u>• <u>C</u>• <u>C++</u>• <u>PHP</u>• <u>DOM-manipulation</u>• <u>Core-nodejs</u>• <u>Recharts-JS</u>	<ul style="list-style-type: none">• <u>Core-Java</u>• <u>HTML5</u>• <u>CSS3</u>• <u>Flexbox</u>• <u>Responsive grid system</u>• <u>Rest-API</u>• <u>Object-Oriented-Programming</u>• <u>Puppeteer</u>• <u>MongoDB</u>• <u>mySql</u>
---	--

Software Engineer

Aug'19 – Present

React, Hooks, HTML5, CSS3, SQL , MongoDB,

Created **react components** using appropriate framework.

created API routes to and refactored **serverless functions**.

used postman to test the server side api routes.

used version control **GIT** for code management and creating pull requests.

Internship

The Entrepreneurship Network

Aug'21 - Oct'21

created a web automation tool to pull out the cricket player information from the internet.

used puppeteer to scrap the information like teams, club's player name and other granular information about the players in USA.

Using the same tool scraped the information of the same players working reputable organization from Linked-In website to generate quality leads.

Out of 10,000 players, liaising with sales and marketing team we were able to convert 10% as paying customer for the product sold in USA. Technology used: JavaScript, html, CSS, NodeJS, puppeteer and others.

Gatistavam Softech

Jan'22 - Present

Created custom react hooks.

Create and execute CRUD operation using Rest-API.

Develop Dynamic API to send and get the response of data using same end point.

Chart to display data from database.

Components are made with dynamic-rendering.

Youtube UI - clone

youtube clone with user interface and fully responsive.

search functionality which renders you to static page

The stack use are react, react-router-dom, matrial-ui,etc.

<https://youtube-f7fq41b7h.vercel.app/search/salman%20khan>

Covid-Tracker Website

website with a daily cases of covid, it shows infected cases, recovered cases and death cases with daily increment in number of cases in world.

the map representing cases all over the world.

it uses api to fetch daily data and update the cases.

it's fully mobile responsive.

<https://github.com/ksyp-7/covid-19>

instagram-clone

instagram with full functionality of user authentication.

you can upload photo and add comments.

the stack used are material-ui, react and firebase as a database etc.

it's fully mobile responsive.

<https://github.com/ksyp-7/instagram-clone>

Amazon-clone

amazon with full functionality of Login and signup.

user can select products and add to cart

user can checkout the product.

displaying list of products using css animation at the top.

user can add or remove products without refreshing.

the stacks used are axios, react, firebase as a database, material-ui, react-router-dom, etc..
